ABOUT ME

I am a Computer Science student at Holy Angel University with a solid foundation in backend development and a growing expertise in the IT field. I have strong familiarity with programming languages like Python and Java, and experience in managing databases such as PostgreSQL, Firebase, and Supabase. I have recently discovered a dual passion for both building applications and the practical hardware and software systems that keep them running. I apply an analytical and methodological approach to troubleshooting, with solid hands-on experience in hardware, software, and network diagnostics. As a collaborative team player, I am very willing to further improve my skill-set and leverage my problem-solving and technical versatility to excel in either an IT role or a Web Developer role while maintaining standards.

EDUCATION

HOLY ANGEL UNIVERSITY

Bachelor of Science in Computer Science

Thesis: SmartTarget : Context-aware Advertising Using Camera Sensors in

Clothing Stores Using Faster R-CNN and SVM

Achievements: Dean's List 2022-2025

Angeles City, Pampanga

2022-PRESENT

HOLY ANGEL UNIVERSITY

Senior High School

Graduated with Honors

Angeles City, Pampanga

2020-2022

NOTABLE PROJECTS ACCOMPLISHED

SmartTarget: Context-aware Advertising Using Camera Sensors in Clothing Stores Using Faster R-CNN and SVM

Backend Developer and Project Manager

2024-2025

- Backend developer for SmartTarget who **implemented Faster R-CNN and SVM algorithms**, developed most of the core backend-side in **Python**, and trained the models to enable real-time object detection and classification through camera sensors.
- Served also as the Project manager of the team, checking everyone's development progress through **Github Actions**, and guiding members through **Messenger and Discord** in completing their assigned tasks.

From The Pen:Simple Notes App powered by Flutter and Firebase

Backend Developer

2024-2024

- Developed most of the backend core functionalities through **Flutter and Dart**.

- Responsible for the integration of **Firebase** into the Flutter application to enable seamless data storage and synchronization across devices.

CERTIFICATIONS & TRAINING

IT Support Intern (OJT) | Clark Outsourcing - March 2026

- Performed hardware maintenance and upgrades, including RAM/SSD installations, NUC replacements, and CPU re-thermal-ing for office workstations.
- Resolved daily software and connectivity tickets, troubleshooting Microsoft office apps performance issues, system optimizations, and physical layer faults through cable re-crimping.
- Assisted in basic website issues, such as managing IP unbanning and ensuring functional connectivity.

CyberThreat Management - Cisco 2024

CCNA - Introduction to Network - Cisco 2024

JavaScript Essentials 1 - Cisco 2025

English for IT 1 - Cisco 2025

Scientific Computing with Python - freeCodeCamp 2026

Responsive Web Design - freeCodeCamp 2026

Data Analytics Essentials 1 - Cisco 2026

SKILLS

TECHNICAL:

- Languages: Python, Java, JavaScript, Dart
- Database Management: PostgreSQL, Firebase NoSQL, Supabase
- Cloud: AWS
- Framework: React, TailwindCSS, Scikit-Learn
- IT Operations & Hardware: Component Upgrades (NUC), Microsoft 365 apps advanced troubleshooting, Network Troubleshooting, Software Installation and Configuration, Browser optimization, PC maintenance

SOFT:

- Adaptive
- Interpersonal Support
- Teachability
- Attention to Detail
- Time and Task management
- Collaborative
- Communicative
- Leadership
